M.I.T.E. Project

*"The speed and the exciting
rumble of the motors, dominate
the time and the space that loses
its static character and its inert
passivity in order is made dynamic, fluid,
limitless and opened"*

F.T. Marinetti

M.I.T.E. project—Mit Insieme Together Ensemble - is born in the 2000 from an idea of Gilberto Pozza and Bruno Ferrari, which plan of integration and insertion in the world of the motors of subjects with serious visual deficits. The objective is the access to possibility of increase and comparison in fascinating and unusual atmospheres. The contest becomes, in so far as, a comparison moment, the validation of attitudes and potentiality. Radar in braille, then, allows to the navigators of living the contest in active way and they do not give simple passengers. The writing of notes leaves from one supplied from the organizers and translate copy in black in tipsy in synthetic and essential way. It comes therefore executed an express control on the distance. Finally, thanks to the collaboration of the Italian Union of the Blind, from there come reproduced many copies how many are the crews in contest.
